Quick reference card .

For BVS series Bladder Volume Scanners

Turn on the BVS by pressing the power button •

Press the powerbutton 4 seconds. If the device is in sleepmode press also the button. The instrument turns on.

Patient •

Have the patient lie in the suspine with abdominal muscles relaxed.

Use sufficient amount of gel.

Place an ample amount of gel on the probe head or on the midline of the patients abdomen approximately 1 inch (2-3 CM) above the symphysis pubis (pubic bone). Place the instrument on the patient's abdomen, and aim the instrument slightly (15° ~ 30°) downward the patient's coccyx (tail bone).

mediate+medical.

Press and release the scan button •

Locate the bladder with the Pre-Scan Function.

- Aim the probe head towards the bladder
